Task 2: SOAR Playbook Development

Analyst: analyst1@th.local
Organization: SOC
Date: April 28, 2026

Objective

Design and execute a phishing incident response playbook using TheHive.

Lab Setup

Component	Detail
SOAR Platform	TheHive 5.2
URL	`http://192.168.56.110:9000`
Admin User	admin@thehive.local
Analyst User	analyst1@th.local
Organization	SOC

Scenario

User reported receiving an email:

- **Subject:** Urgent Invoice Payment Required
- **Sender IP:** 203.0.113.50
- **Attachment Hash:** d41d8cd98f00b204e9800998ecf8427e

Playbook Steps

STEP	ACTION	STATUS
1	Extract IOCs (IP, hash)	Completed
2	Check IP reputation	Completed — Malicious
3	Check file hash	Completed
4	Block indicators	Completed
5	Notify affected user	Completed
6	Close case as True Positive	Completed

Playbook Summary (50 Words)

When a phishing alert is received, create a High-severity case in TheHive and extract all IOCs. Check sender IP and attachment hash against threat intelligence. If confirmed malicious, block the indicators and notify the user. Document findings and close the case as True Positive.

Case Details

Field	Value
Case ID	#1 (-8413376)
Title	Phishing Alert: Suspicious Email from 203.0.113.50
Severity	High
TLP	Amber
Tags	phishing, email, T1566
Created	28/04/2026, 13:35
Closed	28/04/2026, 13:47
Resolution	True Positive

Observables Added

Type	Value	Tags
IP	203.0.113.50	phishing, C2
Hash	d41d8cd98f00b204e9800998ecf8427e	attachment, pdf

Timeline

Time	Action
13:33	Case started
13:35	Case created with details
13:37	IP reputation check completed
13:43	Observables added
13:44	Block indicators task completed
13:46	User notification completed
13:47	Case closed

Metrics

Metric	Value
Time to Detect	2 minutes
Time to Respond	12 minutes
Total Handling Time	14 minutes
