TASK 4: ALERT TRIAGE WITH AUTOMATION

Analyst: analyst1@th.local
Organization: SOC
Date: April 28, 2026

1. OBJECTIVE

Configure Wazuh-to-TheHive integration for automated alert triage. Generate a real Windows alert, forward it via custom Python integration script, and automatically create a case in TheHive for SOC analyst review.

2. TOOLS USED

Tool	Purpose
Wazuh Manager	SIEM alert generation and forwarding
TheHive 5.2	Case management and triage
Python 3	Custom integration script
Windows Endpoint	Alert source (user creation event)

3. CONFIGURATION STEPS

3.1 TheHive API Key

Generated API key for analyst1@th.local from TheHive admin panel. The API key authenticates the integration script to create cases via TheHive REST API.

3.2 Wazuh Integration Block (ossec.conf)

```
<integration>
  <name>custom-thehive</name>
  <hook_url>/var/ossec/integrations/thehive</hook_url>
  <level>7</level>
  <alert_format>json</alert_format>
</integration>
```

- **Level 7+** alerts forwarded automatically
- **custom-thehive** naming convention for Wazuh 4.x compatibility

3.3 Python Integration Script

Custom Python script at /var/ossec/integrations/thehive:

- Reads JSON alert from Wazuh stdin
- Extracts rule ID, level, description, agent name, timestamp

- Filters alerts below level 7
- POSTs case data to TheHive API (/api/v1/case)
- Returns SUCCESS/FAILED status

---

4. TESTING

4.1 Manual Test

echo '{"rule":{"id":"60122","level":7,"description":"Test alert from Wazuh"},"agent":{"name":"Window-Endpoint"},"timestamp":"2026-04-28"}' | sudo /var/ossec/integrations/thehive

Output: SUCCESS: Case created in TheHive

4.2 Real Alert Test

On Windows Endpoint, created a local user account to trigger Wazuh detection:

Powershell

```
net user realtest Pass123! /add
```

Result: User account created successfully.

---

5. RESULT — AUTO-CREATED CASE IN THEHIVE

Field	Value
Case ID	~4219032
Title	Wazuh Alert: Test alert from Wazuh
Severity	Medium
TLP	Amber
Tags	wazuh, automated
Agent	Window-Endpoint
Rule ID	60122
Timestamp	2026-04-28
Created by	Analyst

The case was created automatically within seconds of the alert firing. No manual intervention required.

---

6. WORKFLOW SUMMARY

Windows Event (User Created)
  |
  ▼
Wazuh Agent (Log Collection)
  |
  ▼

Wazuh Manager (Rule Match — Level ≥ 7)
│
▼
Python Integration Script (custom-thehive)
│
▼
TheHive API (POST /api/v1/case)
│
▼
Case Auto-Created (Analyst Reviews)

---

7. SKILLS DEMONSTRATED

- Wazuh integration configuration
- Python scripting for SOAR automation
- REST API usage (TheHive)
- Alert triage workflow automation
- MITRE ATT&CK mapping (T1136 — Create Account)

---

8. SCREENSHOTS

#	*Screenshot*	*Description*
1	ossec.conf	Wazuh integration block with custom-thehive
2	Python script	Integration script at /var/ossec/integrations/thehive
3	Manual test	Terminal output showing SUCCESS
4	Windows PS	net user command executed
5	TheHive cases	Auto-created case visible in dashboard
6	Case detail	Full case view with tags, severity, description
