TASK 7: SECURITY METRICS & EXECUTIVE REPORTING
Analyst: SOC Analyst
Date: April 28, 2026
Status: Complete

1. OBJECTIVE

Create a metrics dashboard in Kibana and draft an executive summary presenting SOC performance for Week 4.

2. METRICS DASHBOARD

Metric	Value
MTTD	2 minutes
MTTR	12 minutes
Total Incidents	2
Detection Rate	100%
Phishing Cases	1
Alert Triage Cases	1

3. EXECUTIVE SUMMARY

This week, the SOC team executed multiple security operations including proactive threat hunting, automated alert triage, incident response, and adversary emulation.

Key Metrics:
- MTTD: 2 minutes
- MTTR: 12 minutes
- Total Incidents: 2
- Detection Rate: 100%

Incidents were triaged through Wazuh-to-TheHive automated integration, reducing manual effort. Adversary emulation with MITRE Caldera validated detection coverage for Discovery-phase TTPs. All process creation events were successfully logged in Elastic Security.
Recommendations:
1. Continue phishing awareness training
2. Implement DMARC for email security
3. Automate containment via SOAR playbooks

The SOC met all operational SLA thresholds this period.

4. SCREENSHOTS
